

Compound Sentence

A **compound sentence** contains two independent clauses joined together by a comma and a coordinating conjunction (for, and, nor, but, or, yet, so) or by a semicolon (;).

Examples: All mammals are warm blooded, but all mammals don't live on dry land.

Tigers and lions are mammals; ants and roaches are insects.

Exercise Each compound sentence has two independent clauses joined together with a comma and a coordinating conjunction. Underline each subject once and each verb twice. Highlight or draw a circle around the coordinating conjunction.

Example: Humans and dogs are both mammals, **yet** humans walk upright.

1. Bats are the only mammals that are capable of flying, so some people mistake them for birds.
2. The number of cervical vertebra is seven in almost all mammals, but the sea cow has eight.
3. Whales and dolphins live in water, yet they are air-breathing animals.
4. Most mammals give birth to live babies, but the duck-billed platypus lays eggs.
5. Elephants have very large ears, but they have very poor hearing.
6. The bat's leg bones are too thin to hold up their bodies, so they hang upside down.
7. The elephant is a huge animal, yet the blue whale is even larger.
8. The cheetah is the fastest mammal, and the sloth is the slowest.
9. Mammals are the only species that has hair, and they are the only one with one bone in the lower jaw.
10. Reptiles and fish have many sets of teeth, but mammals have only two sets.
